

Guarantee for SunEarth® Solar modules

TDB125*125-72-P / TDB125*125-96-P
and TPB156*156-60-P / TPB156*156-72-P

Contractual partner for claim under guarantee is the SiG Solar GmbH in the name of Sun Earth Solar Power Co. Ltd. The following listed guarantees apply exclusive and only for SunEarth® modules which are ordered by SiG Solar GmbH.

Assertion of demands

Any kind of demand has to be send from customer in documented form immediately after note of defect or difference from guaranteed performance demands to authorized seller/salesman or SiG Solar GmbH. If applicable pictures have to be add to documentation.

Product or guaranteed performance demands are described in original invoice which has to be added to documentation. The buying date, module description, serial number and authorized seller/salesman results also in original invoice. Dismantling and/or return of modules happen only after written confirmation.

Repairing and/or exchange of modules happen only from SiG Solar GmbH authorized personnel.

We herewith guarantee that SunEarth® modules are free of defects at material and manufacture for **ten years**. Disclosed are malfunctions due to misuse and failure of installation.

We herewith guarantee that SunEarth® modules will have after 10 years at least 90% of their original power (documented in flashreport) under test conditions from supplier (STC).

If an accredited laboratory from SiG Solar GmbH diagnose after **10 years** that the performance of modules will be less **than 90%** as in original documented flashreport, SiG Solar GmbH will deliver modules depending on own choice as replacement, to repair existing modules (if possible) or deliver additional modules which are balancing the loss of power. Earlier used modules can also be delivered. The decision beyond it got only SiG Solar GmbH.

We herewith guarantee that SunEarth® modules will have **after 25 years at least 80%** of their original power (documented in flashreport) under test conditions from supplier (STC). If an accredited laboratory from SiG Solar GmbH diagnose after 10years that the performance of modules will be less than 90% as in original documented flashreport, SiG Solar GmbH will deliver

modules depending on own choice as replacement, to repair existing modules (if possible) or deliver additional modules which are balancing the loss of power. Earlier used modules can also be delivered. The decision beyond it got only SiG Solar GmbH.

Above described guarantee regulations apply only under following terms and conditions:

1. Correct, protected transport and careful handling of modules before installation, protect for damage through downthrow, knock, snow load within IEC 61215 regulations or similar – broken or damage due to fallen modules, collision damage by e.g. pallet transporter, stones or similar are not excluded in this commitment
2. Modules are used only according their appointment and mounted in correct area
3. Modules are correct mounted as well as connected according mounting instruction
4. Modules are not modified, units remote or original labels remote or damage
